Geography

Geography (BA)

SLO01: Geographic Information Science
Student Learning Outcome 01: Geography majors will develop skills in analyzing and interpreting the world in spatial terms, including use of remote sensing and geographic information systems for collecting spatial data, and demonstrating various methods for representing, interpreting, and analyzing spatial data on maps.

SLO02: Human Geography
Student Learning Outcome 02: Geography majors will be able to utilize empirical information and fundamental principles of social science inquiry to analyze or explain social, cultural, economic, or political conditions and institutions in their geographic context.

SLO03: Physical/Environmental Geography
Student Learning Outcome 03: Geography majors will develop an understanding of scientific inquiry methods and important theories used in the study of geophysical processes and dynamics that affect Earth's geologic, hydrologic, and atmospheric systems. They will be able to explain linkages between the geosciences and sustainable environmental practices and policies.
