College of Arts and Sciences

Psychology

Psychology (BA)

**SLO01: Communication Skills**
Students will develop the ability to communicate psychology information effectively in speaking and writing.

**SLO02: Critical Thinking Skills in Psychology**
Students will acquire the ability to use critical thinking and skeptical inquiry to assess the quality and validity of information presented in both scientific and popular media publications, including the ability to differentiate empirical evidence based conclusions from opinion and speculation and knowledge of common fallacies in thinking.

**SLO03: Information and Technological Literacy**
Students will acquire the ability to use computer-based information databases in psychology and to use appropriate software for data analysis and graphic presentation of data-based research findings.

**SLO04: Knowledge Base of Psychology**
Students will understand the nature of psychology as a science that is based upon empirical data, will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in the science of psychology, and will acquire in-depth knowledge in at least one of the sub-areas of the science.

**SLO05: Research Methods in Psychology**
Students will develop competence in the conduct, interpretation, and evaluation of the research methods used in the science of psychology. Students will acquire knowledge of the different research designs used in psychology, develop skill at evaluating the appropriateness of conclusions derived from psychological research, and learn to design and conduct basic studies to address psychological questions.
