AGENDA ITEMS:

I. Approval of October 20, 2023 minutes

II. Old Business

01.	Course:	CHE 668 Introduction to Chemical Biology
	Request:	New course
	Eff. Term:	Fall 2024
(10/20/23) Rollback: Recommend that the department only move forward with CHE 668 and allow both doctoral and master's students to enroll. The committee requested a clear distinction between the expectations for master's and doctoral work for the course. The committee also recommended revisiting the prerequisites as the courses as currently written cannot be enforced by the University Registrar's Office. 10/27/23: Additional feedback provided to department that both CHE 668 and CHE 768 can be proposed to address funding concerns and clarify expectations for master's and doctoral students.		
Dept. response: Prerequisites revised to be strongly recommended; text in syllabus provided regarding student expectations depending on their level:		

As this course is cross listed at the 400, 600, and 700 levels, students will have different expectations depending on their level. This is reflected in the SLOs. Additionally, specific assignments may differ to better match these SLOs. Below are some examples:

- Students in CHE 768 will be required to present two papers instead of one throughout the semester.
- Students in CHE 768 will be required to include a proposal for additional research to more deeply examine the topic for each paper discussed in class
- Students in CHE 668 and 768 will be required to submit longer written summaries of discussed articles.
- Students in CHE 768 will develop a more comprehensive final project that includes a longer presentation and written document than students in CHE 668.
- Students in CHE 668 and 768 will be required to submit a written document to accompany the oral project of their final project. Students in CHE 468 will only be required to complete an oral presentation.
- Students in CHE 468 will have one fewer question on problem sets and in class exams.
